

4 Organs

Activity 1

Draw and label where the following are in your body:

Stomach

Heart

Eyes

Liver

Intestines

Ears

Lungs

Brain

Tongue

Which of the organs that you have labelled:

- pumps blood?
- lets air in and out of the body?
- detects sound?
- gets rid of poisons from the blood?
- helps us think?
- helps break down food?

Which organ gets damaged when you drink too much alcohol?

Activity 2

Fill in the gaps in the following table:

Sense	Organ used
Smell	
	Tongue
Touch	
	Ear
	Eye

Which sense do you use when reading Braille?

Why can you not see at night?

Challenge *Organ Passport*

Design a passport for an organ – for example, brain, heart, stomach, kidney, liver or lungs.

The passport will need to contain the following information:

- The organ's name
- A picture
- Where it lives in the body. A diagram might help you show this
- Its function (the job that it does in the body)
- Other interesting facts
